

THM 10x32 MULTISWITCH & TAP

Easy Instalation

It's easy for installation because of compact & useful design.

Low Cascade Insertion Loss

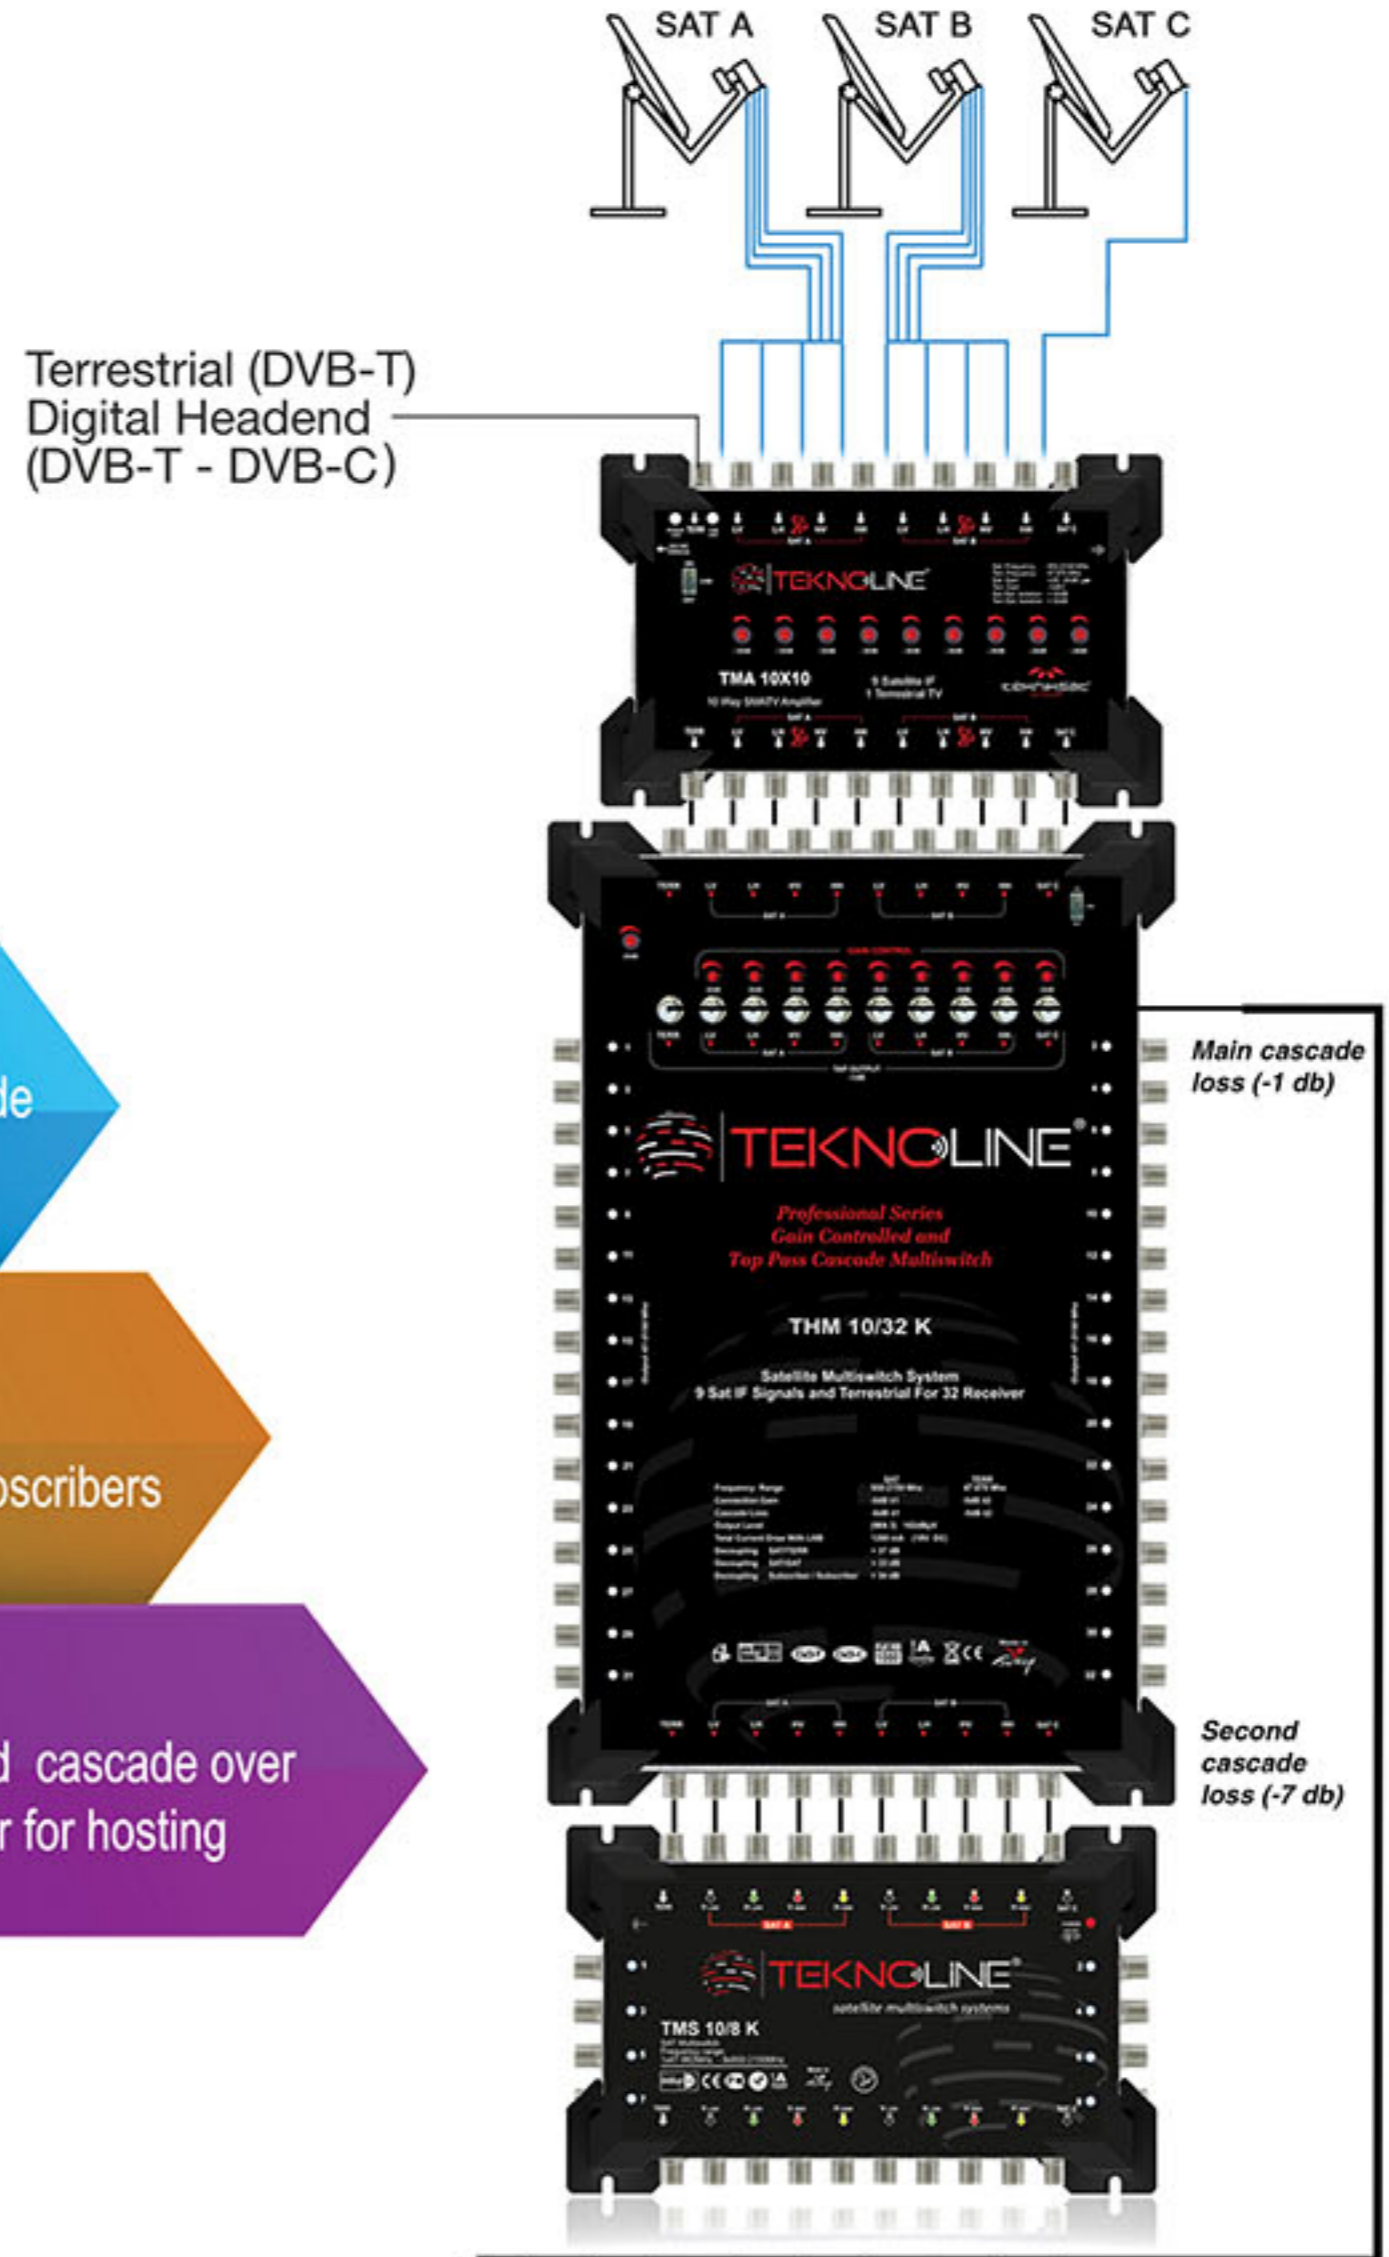

By using tap cascade system the cascade insertion loss is less than 1dB.

Subscribers Gain Control

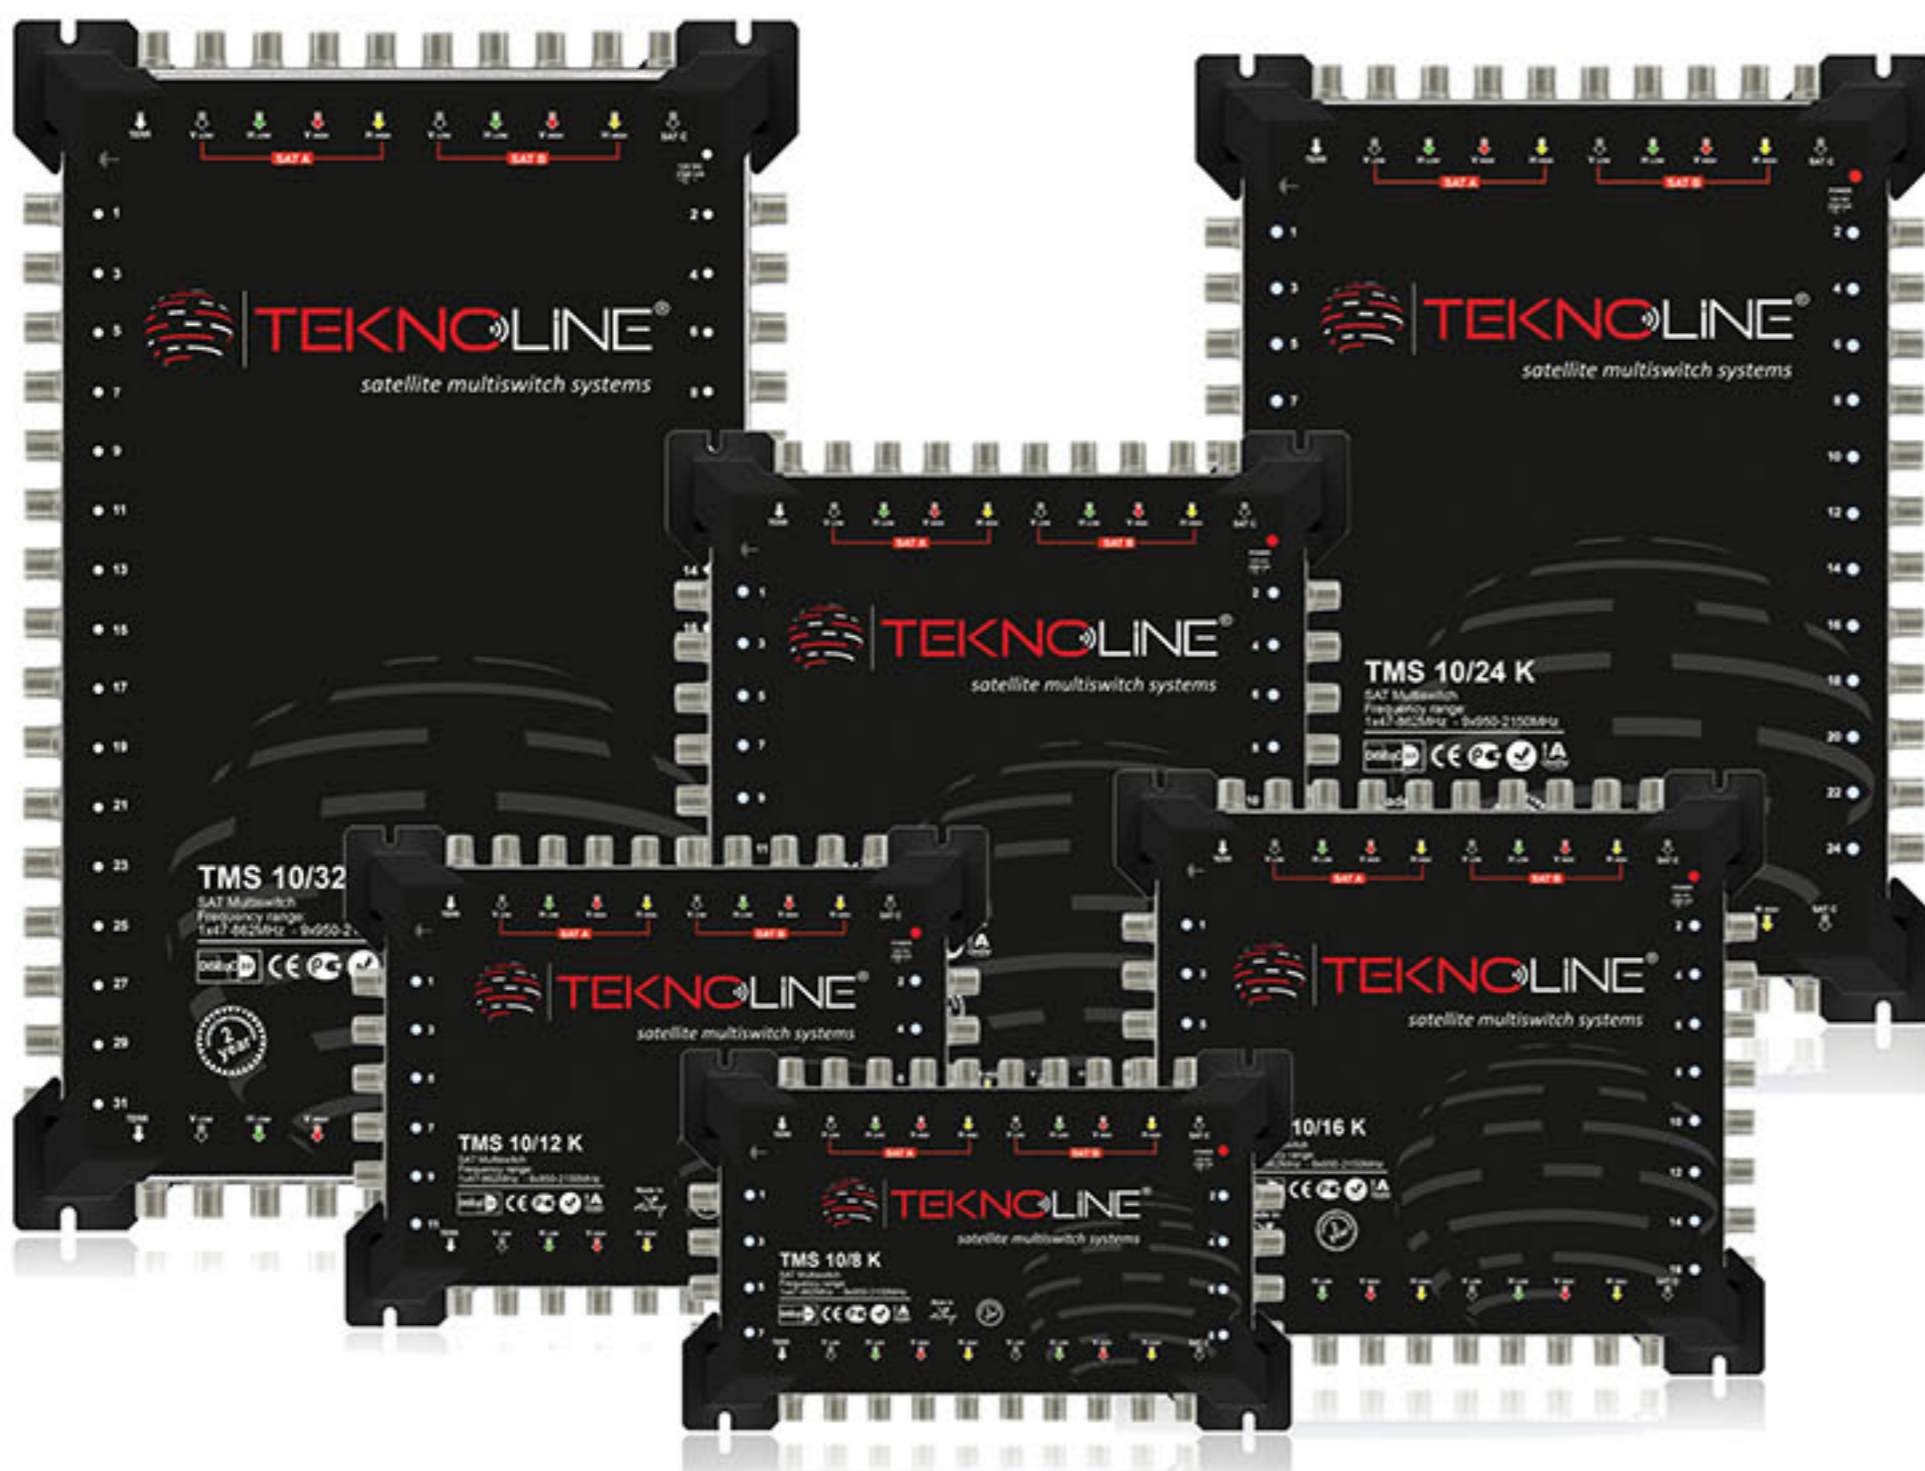

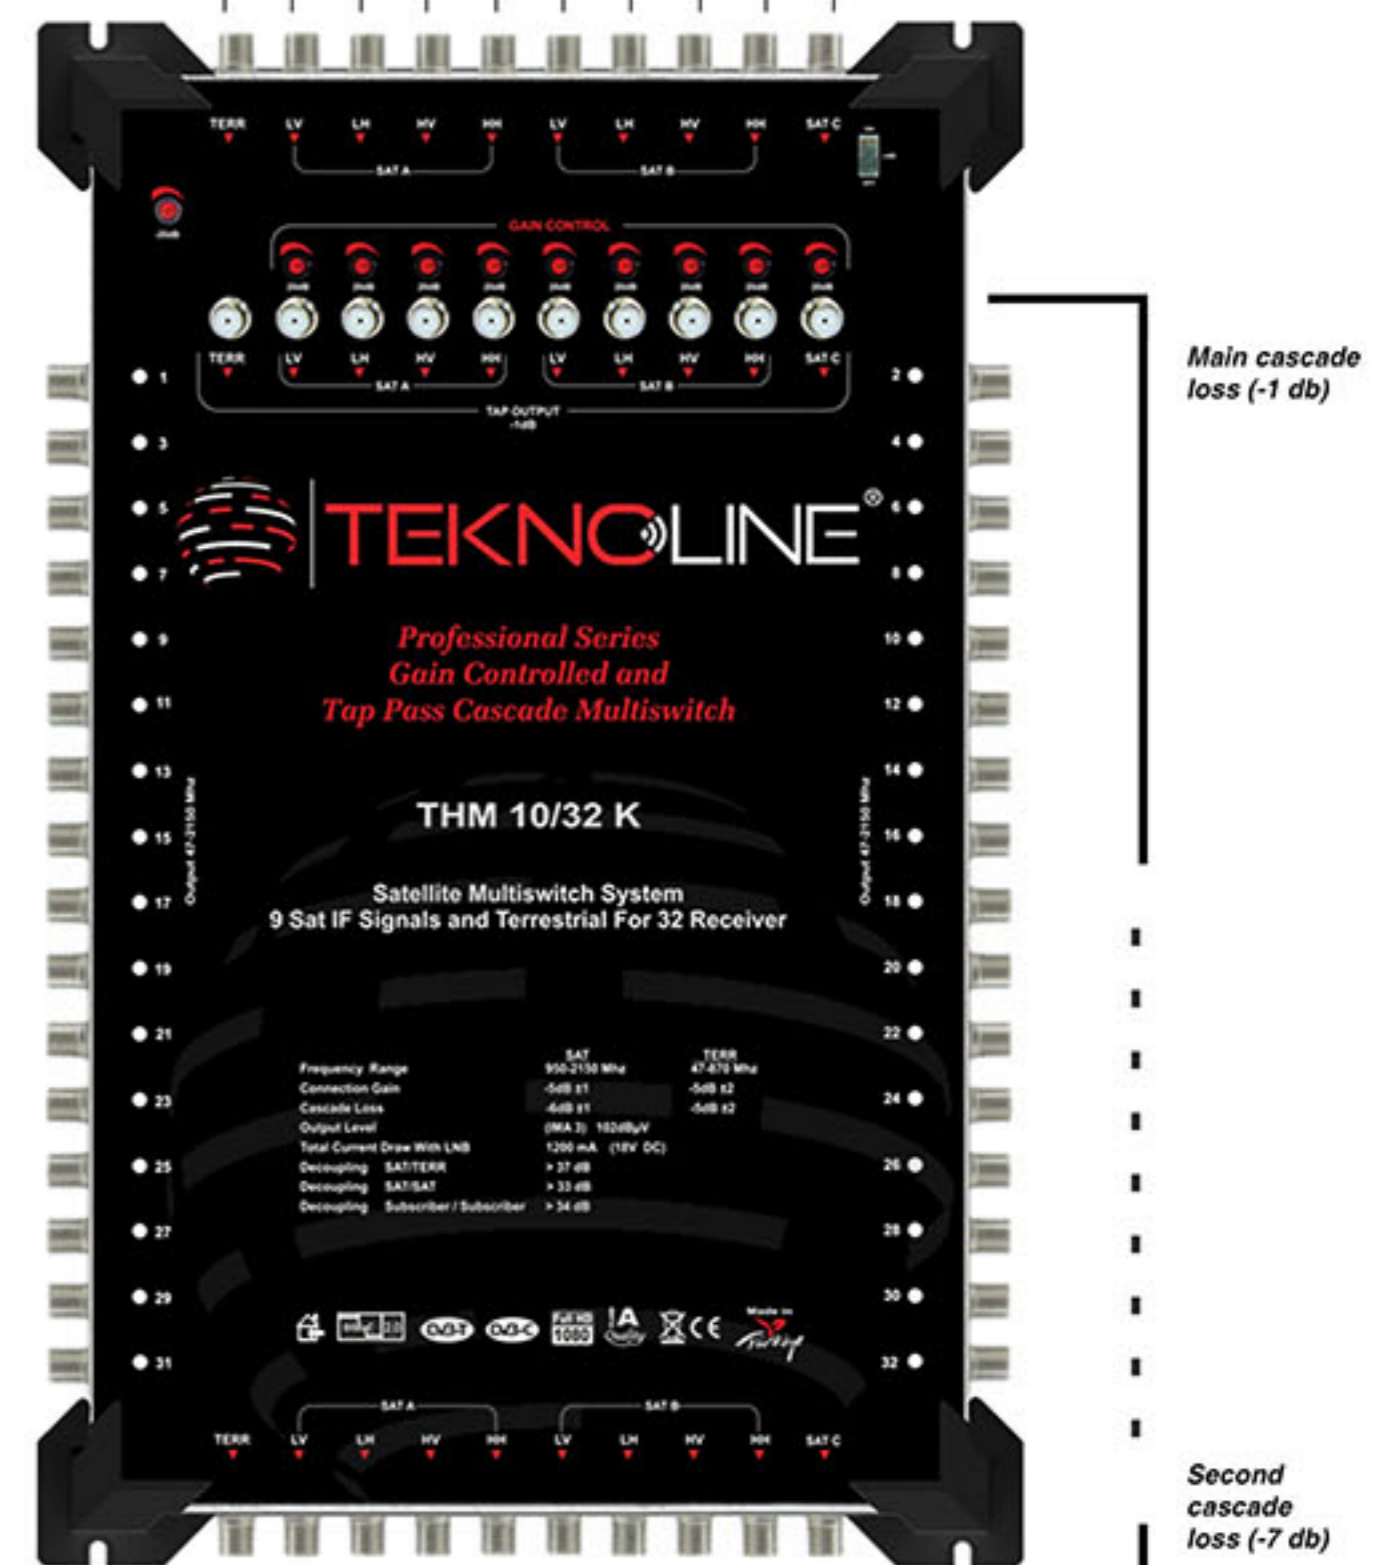

Each sat pol.gain is controlled for all Subscribers

Lots of Subscribers

By using tap cascade system,connected cascade over then 8 multiswitch without using amplifier for hosting more and more Subscribers

Due to collect tap and multiswitch useful for quick instalation and distributing sat and headend system signals for big projects with low cascade insertion loss. It's connected cascade until 8 without using amplifier between cascade multiswitch. The each Sat.Pol. Input gain is adjustable for multiswitch subscribers.

5 Times Again
